Disaster Recovery Benefits includes:

- **End-to-end capabilities for the hybrIT:**

Our business continuity and disaster recovery services are designed for hybrid infrastructure and applications of the future, with end-to-end capabilities from consulting, cloud-based managed disaster recovery service, to programme management.

- **Cost effective and timely recovery without additional investments:**

We can support you in making the most effective use of cloud-based disaster recovery, removing the need for maintaining recovery infrastructure, resources, or technology.

- **Seamless operational resiliency:**

We take responsibility for creating, executing, and maintaining the disaster recovery plan to keep up with your changing operational requirements while you focus on strategic initiatives.

- **Business outcome-driven consulting:**

We can help you shape your strategy and implementation with industry leading practices and align it to your specific business requirements.

Our Disaster Recovery services includes

- ❖ **Disaster recovery plan development:** We help you enable quicker, more cost-effective business resumption through the development of disaster recovery plans that are aligned with your business goals. •
- ❖ **Disaster recovery response:** Our IT experts will test and be available to execute your disaster recovery plans 24/7, as well as assist in the failback. •
- ❖ **Disaster recovery programme management:** Our programme management expertise and best practices will assist in the lifecycle management of your business continuity management practice.

Disaster Recovery Fact

75% do not have disaster recovery plan in place
